COMPATIBLE CABINETS³

Pump It Up LX	YES	N/A
Pump It Up CX	YES	N/A
Pump It Up TX	YES	N/A
Pump It Up FX	NO ⁴	YES

1. MK9 is Andamiro's Pump It Up computer powered by an Intel Celeron processor. Minimum hardware requirements for the PHOENIX 2 upgrade (same as the original Phoenix upgrade [sold 2023-2025] and the 20th Anniversary [sold 2019-2022]): **(1) CPU** » Intel Celeron E3400 or better and compatible with LGA 775 socket; **(2) RAM** » 1GB or more; **(3) Motherboard** » ASRock G41C-GS R2.0 or equivalent.

2. Package sizes will vary according to marquee.

3. Early Pump It Up cabinet versions featured SD (standard-def) monitors, and PIU PHOENIX 2 does not support SD. However, some older machines, especially the SX, GX and DX models, were upgraded with HD (high-def) monitors and/or MK9 boxes, and these may support PIU PHOENIX 2 software; updating these cabinets will need to be addressed case-by-case. Tip: machines running the original Phoenix can instantly start PHOENIX 2 by installing kit No. 1.

4. Exception: FX cabinets already updated to MK9 boxes may be compatible with "upgrade *without* main box." Please call.

Questions? Email Andamiro USA's support departments at service@andamirousa.com or parts@andamirousa.com, or call us at (972) 445-9110. When contacting us about Pump It Up upgrades, provide the serial number of the game you wish to update. To help expedite your query, please take a photo of the white factory origin/game ID label on the back of the game and cabinet itself, and send those photos to the Andamiro team member assisting you.
